

Clinical Research Certification Program

Job-oriented Certification program in Clinical Research

Clinical Research

Clinical Research refers to a study conducted to evaluate a potential treatment and its effects on human beings. Clinical trials help us find out if a promising new treatment is safe and effective. During a trial, more and more information is gained about a new treatment, its risks and how well it may or may not work.

According to Frost & Sullivan's industry report, the global CRO market is pegged at around US\$20 billion with India's share being about US\$485 million and it is expected to cross the US\$1 billion mark by 2015.

Programme Summary

Certificate in Clinical Research (CCR) is designed to provide candidates with an opportunity to acquire and develop the expertise necessary for effective clinical research. These programmes are designed to meet the high demand for trained personnel for human clinical trials.

The Program enables you to master practical aspects of clinical trial conduct and management, including clinical trial phases and design, planning, implementation, data analysis, regulatory and procedural guidelines and ethical considerations.
